# Notice for TAIYO YUDEN Products

Please read this notice before using the TAIYO YUDEN products.

## !\ REMINDERS

Product information in this catalog is as of October 2017. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or use of our products.

Please note that TAIYO YUDEN shall not be in any way responsible for any damages and defects in products or equipment incorporating our products, which are caused under the conditions other than those specified in this catalog or individual product specification sheets.

- Please contact TAIYO YUDEN for further details of product specifications as the individual product specification sheets are available.
- Please conduct validation and verification of our products in actual condition of mounting and operating environment before using our products.
- The products listed in this catalog are intended for use in general electronic equipment (e.g., AV equipment, OA equipment, home electric appliances, office equipment, information and communication equipment including, without limitation, mobile phone, and PC) and medical equipment classified as Class I or II by IMDRF. Please be sure to contact TAIYO YUDEN for further information before using the products for any equipment which may directly cause loss of human life or bodily injury (e.g., transportation equipment including, without limitation, automotive powertrain control system, train control system, and ship control system, traffic signal equipment, disaster prevention equipment, medical equipment classified as Class III by IMDRF, highly public information network equipment including, without limitation, telephone exchange, and base station).

Please do not incorporate our products into any equipment requiring high levels of safety and/or reliability (e.g., aerospace equipment, aviation equipment\*, medical equipment classified as Class IV by IMDRF, nuclear control equipment, undersea equipment, military equipment).

\*Note: There is a possibility that our products can be used only for aviation equipment that does not directly affect the safe operation of aircraft (e.g., in-flight entertainment, cabin light, electric seat, cooking equipment) if such use meets requirements specified separately by TAIYO YUDEN. Please be sure to contact TAIYO YUDEN for further information before using our products for such aviation equipment.

When our products are used even for high safety and/or reliability-required devices or circuits of general electronic equipment, it is strongly recommended to perform a thorough safety evaluation prior to use of our products and to install a protection circuit as necessary.

Please note that unless you obtain prior written consent of TAIYO YUDEN, TAIYO YUDEN shall not be in any way responsible for any damages incurred by you or third parties arising from use of the products listed in this catalog for any equipment requiring inquiry to TAIYO YUDEN or prohibited for use by TAIYO YUDEN as described above.

- Information contained in this catalog is intended to convey examples of typical performances and/or applications of our products and is not intended to make any warranty with respect to the intellectual property rights or any other related rights of TAIYO YUDEN or any third parties nor grant any license under such rights.
- Please note that the scope of warranty for our products is limited to the delivered our products themselves and TAIYO YUDEN shall not be in any way responsible for any damages resulting from a fault or defect in our products. Notwithstanding the foregoing, if there is a written agreement (e.g., supply and purchase agreement, quality assurance agreement) signed by TAIYO YUDEN and your company, TAIYO YUDEN will warrant our products in accordance with such agreement.
- The contents of this catalog are applicable to our products which are purchased from our sales offices or authorized distributors (hereinafter "TAIYO YUDEN's official sales channel"). Please note that the contents of this catalog are not applicable to our products purchased from any seller other than TAIYO YUDEN's official sales channel.
- Caution for Export

Some of our products listed in this catalog may require specific procedures for export according to "U.S. Export Administration Regulations", "Foreign Exchange and Foreign Trade Control Law" of Japan, and other applicable regulations. Should you have any questions on this matter, please contact our sales staff.

# **MULTILAYER EMI SUPPRESSION FILTERS**

					Unit: mm (inch)	

## 4 Leader and Blank portion

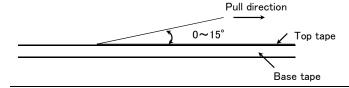

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

### ⑤Reel size

### $\ensuremath{\text{\textcircled{6}}}$ Top tape strength

The top tape requires a peel;-off force of  $0.1 \sim 0.7 N$  in the direction of the arrow as illustrated below.

### **MULTILAYER EMI SUPPRESSION FILTERS**

### ■RELIABILITY DATA

### 1. Operating Temperature Range

### 2. Storage Temperature Range

### 3. Rated Voltage

Specified Value 10V DC

### 4. Rated Current

Specified Value 100mA DC

### 5. Cutoff frequency (T Series)

Specified Value 18MHz±3.6MHz, 25MHz±5MHz, 40MHz±10MHz, 100MHz±20MHz, 160MHz±30MHz, 200MHz±40MHz, 400MHz±80MHz

Test Methods and Remarks

 $\begin{array}{ll} \mbox{Measuring equipment} & : 8753D \mbox{ (or its equivalent)} \\ \mbox{Measuring source} & : 0dBm \\ \mbox{Input-Output impedance} & : 50 \ensuremath{\Omega} \\ \end{array}$ 

### 6. Impedance (TZ Series)

Specified Value 70 Ω±30%, 100 Ω±30%, 200 Ω±30%

Measuring frequency : 100MHz

Test Methods and Remarks

Measuring equipment : 4291A (or its equivalent)

Measuring jig : 16192A

: -20dBm

### 7. Capacitance (TZ Series)

Measuring source

Specified Value 17pF±20%, 50pF±20%, 85pF±20%

Measuring equipment : 4194A (or its equivalent)

Test Methods and Remarks Measuring frequency : 1MHz

Capacitance measurement between Terminals 1 and 2.

### 8. DC Resistance

 Specified Value
 2 Ω max., 3 Ω max. (FK2125T107AL)

 Test Methods and Remarks
 Conduct measurement between Terminals 1 and 3.

### 9. Insulation Resistance

Specified Value 30M Ω min.

Test Methods and Remarks Conduct measurement between Terminals 1 and 2.

Applied voltage: 10VDC

### 10. Resistance to Flexure of Substrate

Specified Value

No mechanical damage.

Warp : 2mm
 Testing board : glass epoxy-resin substrate
 Thickness : 0.8mm

Test Methods and Remarks

Remarks

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

11. Solderability					
Specified Value	At least 75% of terminal electrode is covered by new solder.				
Test Methods and Remarks	Solder temperature	: 230±5°C			
	Duration	: 4±1 sec.			
	Preheating temperature	: 150 to 180℃			
	Preheating time	: 2 to 3 min.			
	Flux	: Immersion into methanol solution with colophony for 3 to 5 sec.			

12. Resistance to Soldering				
Specified Value	No significant abnormality in appearance.			
Test Methods and Remarks	Solder temperature Duration Preheating temperature Preheating time	: 260±5°C : 10±0.5 sec. : 150 to 180°C : 2 to 3 min.		
	Flux	: Immersion into methanol solution with colophony for 3 to 5 sec.		

# 13. Thermal Shock

No mechanical damage.

Specified Value Insulation resistance (between 1 and 2)  $20M\Omega$  min. DC resistance (between 1 and 3)  $2\Omega$  max.

:  $3\Omega$  max. (FK2125T107AL)

Test Methods and

Remarks

Step	Temperature (°C)	Duration (min)
1	Minimum operating temperature $+0/-3$	30±3
2	Room temperature	2 to 3
3	Maximum operating temperature $+3/-0$	30±3
4	Room temperature	2 to 3

Number of cycles : 5

No mechanical damage.

No mechanical damage.

Conditions for 1 cycle

Recovery : 2 to 3 hrs of recovery under the standard condition after the test.

### 14. Damp Heat steady state

Specified Value Insulation resistance (between 1 and 2) :  $20M\Omega$  min.

DC resistance (between 1 and 3)  $: 2\,\Omega\,\text{max}.$ 

:  $3\,\Omega$  max. (FK2125T107AL)

Test Methods and Remarks Temperature  $:40\pm2^{\circ}\text{C}$ Tunder Support S

Recovery : 2 to 3 hrs of recovery under the standard condition after the removal from test chamber.

### 15. Loading under Damp Heat

 $\text{Specified Value} \quad \begin{array}{ll} \text{Insulation resistance (between 1 and 2)} & : 20M\,\Omega\,\text{min.} \\ \text{DC resistance (between 1 and 3)} & : 2\,\Omega\,\text{max.} \\ \end{array}$ 

: 3 Ω max. (FK2125T107AL)

Temperature : 40±2°C
Humidity : 90 to 95%RH
Test Methods and Applied voltage : Rated voltage

Applied voltage : Rated voltage (between 1 and 2)
Applied current : Rated current (between 1 and 3)

Duration :  $500\pm12 \text{ hrs}$ 

Recovery : 2 to 3 hrs of recovery under the standard condition after the removal from test chamber.

### 16. Loading at High Temperature

:  $3\Omega$  max. (FK2125T107AL)

Test Methods and Remarks

Remarks

Temperature : 85±2°C

Applied voltage : Rated voltage (between 1 and 2)
Applied current : Rated current (between 1 and 3)

Duration : 500±12 hrs

Recovery : 2 to 3 hrs of recovery under the standard condition after the removal from test chamber.

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).

Note on standard condition:

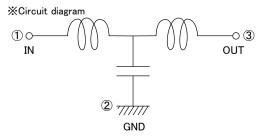

"standard condition" referred to herein is defined as follows :

5 to 35°C of temperature, 45 to 85% relative humidity and 86 to 106kPa of air pressure.

When there are questions concerning measurement results:

In order to provide correlation data, the test shall be conducted under condition of  $20\pm2^{\circ}C$  of temperature, 60 to 70% relative humidity and 86 to 106kPa of air pressure.

Unless otherwise specified, all the tests are conducted under the "standard condition."

Since neither 1 nor 3 is directional, either could be served as the IN terminal.

This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (http://www.ty-top.com/).
